# Glosarium

## Enau

Enau atau Aren adalah tanaman perkebunan yang sangat potensial sebagai penghasil pati dan gula. Tanaman Enau/aren hampir mirip pohon kelapa. Perbedaannya, jika pohon kelapa batang pohonnya bersih (pelepah daun yang tua mudah lepas), maka batang pohon aren ini sangat kotor karena batangnya terbalut oleh ijuk.

## Feijoa

Feijoa adalah buah yang berkerabat dengan jambu biji. Bentuknya mirip seperti jambu dan rasanya seperti nanas, sehingga buah ini juga disebut jambu nanas. Nama lain untuk feijoa antara lain jambu Brazil, jambu nanas, jambu ara, dan jambu biji.

## Honje

Honje atau kecombrang.

## Ilama

Ilama atau Srikaya

## Olalliberry

Olallieberry (diucapkan oh-la-leh) adalah buah utama yang ditanam di pertanian keluarga Linns. Buah beri pertama kali dikembangkan pada tahun 1949 di Oregon State University oleh Departemen Pertanian AS dengan menyilangkan Loganberry dengan Youngberry. Hasilnya disebut Olallie, kata penduduk asli Amerika yang berarti "berry". Olallieberry memiliki ciri fisik blackberry klasik, tetapi secara genetik dua pertiganya adalah blackberry dan sepertiga raspberry merah.

## Quandong

Quandong atau ' Persik Liar ', banyak terdapat dalam mitologi Aborigin di wilayah gurun Australia. Buah yang mengkilap, cerah, dan berwarna merah tua .

## Wuni

Wuni atau buni

## Ximenia

spesies pohon buah-buahan liar yang berasal dari Afrika, dari Tanzania di utara, hingga Afrika Selatan. Pohonnya kecil, tingginya mencapai 6 m, menghasilkan buah berwarna oranye atau merah ketika matang dan kaya vitamin.

## Yuzu

Yuzu atau Citrus junos adalah salah satu jenis buah jeruk. Yuzu adalah turunan dari jeruk mandarin dan citrus ichangensis
